

Environmental Policy

TestPRO Limited is located in Stafford, Staffordshire, and provides a Test and Mechanical Design Analysis service to the Engineering sector throughout the UK and Europe.

The Directors of TestPRO Limited consider environmental management an integral and fundamental part of the Company's corporate business strategy.

We will take all necessary steps to comply with UK and European legislation and other standards affecting our activities, together with any future standards of protection. Using the principle of continual improvement, the Company is committed to the prevention of pollution and aims to achieve the highest possible environmental standards.

These objectives include:

The efficient use of all materials, supplies, energy and transport. Wherever possible the principles of sustainable development will be adopted.

Preventing, reducing or controlling, where practicable, emissions to all environmental media.

The minimisation of waste from all parts of the Company's operations. Wherever possible waste materials will be reprocessed or recycled. In addition, we will require high environmental standards from suppliers, vendors and contractors involved with the company. We will seek to develop and maintain, where significant hazards exist, emergency plans in conjunction with the emergency services, relevant authorities and the local community.

We will ensure that all necessary resources are provided in the areas of operational control, engineering, technology and training as are necessary to enable those with specific duties to effectively discharge their responsibilities.

We will ensure awareness and participation of our employees through communication, training and participation in continuous improvement.

We will ensure that this policy is publicly available to suppliers, customers, and the general public.

This policy document and the objectives and targets will be updated, as necessary following annual management reviews.
