

Class 334 Juniper vibration assessment of power electronics module.

In the November of 2006 TestPRO Limited carried out a series of tests on a Class 334 Juniper operated by First ScotRail. The original manufacturer being ALSTOM Transport, Birmingham.

TestPRO Limited was asked by ALSTOM to measure the vibration levels, temperature and displacements of components on a power electronic module. The test runs were from Shields depot Glasgow to Ayr

TestPRO Limited is delighted to have supported this project by providing a cost effective testing service as an essential part of the design review process.
