

TestPRO limited is a new company based in Stafford and formed from the resources and expertise of the recently closed AREVA (ALSTOM) mechanical engineering and test facility. We have a strong and varied project history involving mechanical design, testing and analysis work stretching back 30 years and enjoying a close association with the rail industry and a diversity of manufacturing companies.

TestPRO offers a complete troubleshooting and design service where we understand the urgency of rectifying vehicle or component failures and can provide a very rapid response to our customers. We are a small but well equipped company offering a competitive package with great flexibility. Working at site is a speciality – UK or worldwide – laboratory testing can also be carried out if required. If you have a component failure or maybe just poor performance we would like to help

TestPRO technologies include:

- ✓ Preparation of test specification and associated documentation
- ✓ Design and procurement of test fixtures
- ✓ Testing on board track test vehicle
- ✓ Test measurements in the depot or laboratory
- ✓ Analysis of test data and fatigue life prediction
- ✓ Failure mode analysis
- ✓ Technical reporting and presentation
- ✓ Assistance with redesign using 2D/3D CAD
- ✓ Prototype evaluation
